DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 1-10 in Paper No. 12 is acknowledged.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 is indefinite because it recites a method of fabricating a "piezoelectric film" but instead the it is the fabrication of a device with the electrode and a substrate, the "piezoelectric film" does not comprise the electrode and the substrate, it is the device that comprises these elements. Furthermore, there is no step claimed that would result in the formation of a piezoelectric film, thus the claim is also omitting a step that is necessary to meet the definitiveness requirement under 112. Please make the appropriate corrections.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

Art Unit: 2825

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1 and 4 are rejected under 35 U.S.C. 102(e) as being anticipation by U.S. Patent No. 6,486,588 B2 (Doron et al.).

Doron et al. discloses a method of forming a device wherein a patterned electrode (item 6) is deposited over a silicon substrate (item 12 and col. 6, lines 25-30) and wherein a piezoelectric film (item 2) is deposited over the electrode but wherein the height of the edge of the electrode has been eliminated thereby resulting in the deposition of the piezoelectric film over a planar surface, inherently resulting in a diminished weakening effect.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 6,486,588 B2 (Doron et al.) in view of U.S. Patent No. 5,552,655 (Stokes et al.).

As stated in paragraph 5, all the limitations of the claims have been met except for teaching that the electrodes are made of aluminum and the piezoelectric material is made of AlN.

Stokes et al. teaches a resonator comprising AlN piezoelectric and aluminum electrodes. (col. 3, lines 59-64).

Art Unit: 2825

It would have been obvious to one having ordinary skill in the specific art to combine the teachings of Stokes et al. to those of Doron et al. since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Allowable Subject Matter

8. Claims 5-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
